## SEE SENSE **EMPOWERING CYCLISTS AND OUR CITIES WITH DATA \\**

See.Sense patent pending technology creates a mobile sensor network using city bikes. Real-time, highly accurate never-before-seen data helps to design better infrastructure and smarter cities:

**Real Time** Journeys

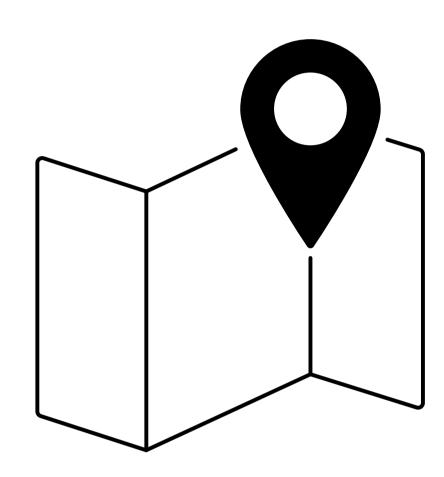

**Road Surface** Monitoring

## HELPS MANAGE CITY BIKE FLEET \\

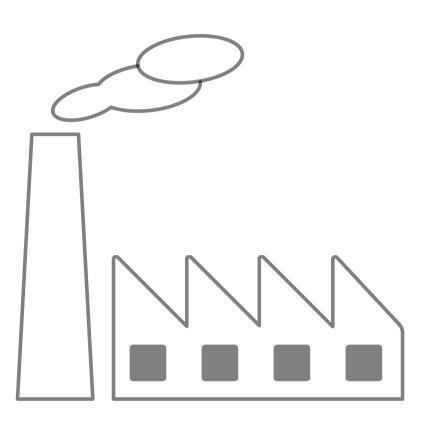

- \_ SOS function provides theft and vandalism alerts
- \_ Bike telemetry and black box features
- \_ Fully integrates inside city bike and is easily retro-fitted

## WORLD FIRST \\

- \_ LoRaWAN enabled device is a low power solution, runs on bike's dynamo, no external charging needed \_ Connectivity and data collection is over a wide area, providing a mobile sensor network platform
- \_ Featured at Mobile World Congress and Wireless Global Congress

Near-Miss & **Collision Reporting** 

Air Quality Monitoring
